

# Reverse Osmosis System

PURE. REFRESHING. GREAT TASTING. FREE OF HEALTH RELATED CONTAMINANTS.

A small faucet, mounted to the left or right of your existing faucet, provides ultra pure water for drinking and cooking.

If you want the best drinking water possible right from the tap, nothing compares to the ultra pure water from a reverse osmosis system. It's the way to have complete peace of mind that your water is free of contaminants such as arsenic, barium, fluoride, copper, chloride, cadmium, bacteria, lead, mercury, nitrate, phosphate, silver, sodium, and zinc.

A reverse osmosis system removes over 90 percent of the sodium salts, so coffee and tea taste better. Pets and plants benefit. No bottled water will taste any better than the water from your faucet. Best of all, it is all natural and maintenance free.

## HOW IT WORKS

Reverse osmosis works at the molecular level. Water is squeezed against a special membrane to separate pure water molecules from impurities. The impurities are automatically rinsed down the drain, leaving only clean, great tasting water.

Other companies mount the system under the kitchen sink, which takes up valuable space. Using just one cubic foot of space, our system is mounted on a wall in the basement. The system is accessible for service, but out of the way. A storage tank is mounted in the floor joist or on the ground. A feed line runs a separate drinking water faucet at the kitchen sink. An additional line can be plumbed to the ice maker. A 3.2 gallon storage tank holds the treated water for your immediate use.

A special membrane lets through ultra pure water molecules and blocks contaminants

## ALL NATURAL, NO REGULAR MAINTENANCE

Maintenance is low on our reverse osmosis systems. The filtration method is all natural, and no chemicals are used to purify the water.

Call us once a year for a system performance check and a complete service of your system.

## WE PROUDLY STAND BEHIND OUR PRODUCT

To give you the confidence that your water problem is solved, your water is tested after the installation and you are provided with the lab results. We proudly stand behind our work and are on call every day of the week when service is needed. Your system comes with a two-year parts and labor warranty.

A 3.2-gallon storage tank holds the ready supply of water.

Did you diagnose your problem? We hope so! If you need further assistance, please call Contoocook Artesian Well at (603) 428-6060 for service 7 days a week.
